

A COMPANY'S  
MOST VALUABLE ASSET  
IS ITS PEOPLE.

ARE YOU DOING  
EVERYTHING YOU CAN  
TO PROTECT THEM?

**R2P** INNOVATIONS  
Protective Doors

## PREVENTION STARTS WHERE BULLETS STOP

AN ACTIVE SHOOTER HAS ONE GOAL.  
R2P DOORS ARE DESIGNED TO DO TWO THINGS:

- 1 Completely shield a room from a high-powered assault weapon, turning an office, classroom, or conference room into a stronghold.
- 2 Provide crucial time until the appropriate response team can arrive.

## TIMELESS TECHNOLOGY, DESIGNED FOR THE MODERN WORLD.

Doors have been protecting and shielding assets for thousands of years. Individuals and weapons have changed and the threats have rapidly evolved in recent times. We need a different way of thinking about safety, a paradigm shift in protecting our people and assets.

**It's time for a major upgrade.**

## LEVEL 8 BALLISTIC STANDARD. MORE THAN A NUMBER, IT'S PEACE OF MIND.

Built with state-of-the-art, proprietary ballistic material, an R2P Protective Door passes 8 levels of UL protection.

Our doors were built to withstand fire from all of these weapons (levels 1-8), and are the first to meet Department of State Revision H Certification for forced entry and ballistic resistance.

## MILITARY TECHNOLOGY, DRESSED FOR THE JOB.

A military-grade door does not have to look like military equipment. In fact, it can be a seamless, beautiful part of any school or office. Pick any size, wood type, color or stain to fit the style of your space. Our goal is to protect without anyone noticing we're doing so.

**Made from advanced materials and built to military standards, the R2P Protective Door is the most innovative anti-ballistic door ever designed.**

- Fits a standard doorway with existing hardware. No structural upgrades or door frame modifications required.
- Ultralight technology, it opens and closes easily.
- Performs with zero maintenance. No ongoing costs.
- Completely customizable in size and style to match any decor.
- Integrates with other security technology (i.e. keypads or scanners).

## HEAVY-DUTY ENOUGH TO STOP A BULLET. LIGHT ENOUGH TO CLOSE QUICKLY.

R2P Protective Doors are easy to open and close quickly in an attack. It's a door that gives you total control of your space, locking down when necessary while operating normally otherwise. Able to work with optional anti-breach and high-security locking systems.

## THE NEWS IS INESCAPABLE

MASS SHOOTINGS  
ARE BECOMING COMMONPLACE.

Doesn't it make sense to do everything in your power to mitigate the devastation of an active shooter event? Everyone would feel more secure and less anxious if they had an effective answer for these terrible situations.

An R2P Protective Door is built with one purpose: to save lives. It's everyone's best defense, a shield designed to safeguard against active shooters. Protect your most valuable assets.

**Never ask yourself if there was more you could have done.**
