CAPABILITIES STATEMENT

ABOUT R2P INNOVATIONS

R2P custom engineers innovative forced entry and ballistic-resistant doors that are built to save lives. Designed for intense environments, R2P doors are created using advanced military-grade materials, tested using extreme standards and customizable to accommodate government / commercial / residential security needs and architectural preferences. R2P stands for "Responsibility to Protect," which serves as the foundation of our mission.

CORE COMPETENCY

R2P Innovations' doors and frames are built to Department of State specifications for Ballistic Resistant (BR) and Forced Entry Ballistic Resistant (FEBR) doors that meet its mission to ensure the security of U.S. personnel and property.

R2P addresses lifesaving security needs with a protective wooden door that is functionally and ergonomically superior.

WHAT SETS R2P DOORS APART

Our doors provide protection as an attractive and discreet wooden door with half the weight of equivalent protective doors. This lighter weight reduces user effort, decreases wear on door and frame, lowers sustainment costs and significantly reduces shipping costs.

R2P doors are the first to meet the rigorous Department of State SD-STD-01.01, Revision H certification standard for forced entry and ballistic-resistant doors.

R2P DOOR FEATURES

- UL 752 Level 8 (7.62 x 51 FMJ NATO rounds) protection in any doorway; withstands 100+ rounds
- Standard 1-3/4" thickness for cost-effective retrofitting into existing openings; no modifications needed.
- Accepts all locking and security systems, as well as any advanced electronic access controls.
- Turn any room into a safe room, while keeping protection hidden in plain sight.
- Light, ergonomic and easy to operate
- Customizable in size and style to match any decor.
- The best value with unrivaled quality, aesthetics and protection, and no ongoing maintenance costs.
